DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, 19 and 20, drawn to an apparatus, classified in class 285, subclass 39.
- II. Claims 16-18, drawn to a method of assembling a plurality of pipe pieces together, classified in class 264, subclass 230.

The inventions are distinct, each from the other because of the following reasons:

Inventions group 2 and group 1 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process of making can be utilized to make an apparatus which does not have a first piece of pipe with a cross-sectional wall pattern along its length that is similar in size and shape to the cross-sectional sidewall pattern of a second piece of pipe.

Because these inventions are distinct for the reasons given above and the search required for Group 2 is not required for Group 1, restriction for examination purposes as indicated is proper.
